1) Strategic Discussion: Implementation and the national accountability cycle - How are Core Group members engaging? What are the opportunities for Together 2030?

In this session, Core Group members had an exchange of experiences on their current engagement on VNRs. Javier informed that Cepei is working on a product on VNRs in Latin America and the Caribbean countries, including setting up a group of specialists to follow up after the VNRs.

Gomer informed that Asia and Pacific will be developing regional indicators and that he will be keeping the Core Group informed. Ola informed that Leonard Cheshire is currently undertaking research in four countries, focusing on gathering information about the integration of disabilities in SDG implementation on the ground.

Nalini shared the experience of Sightsavers in India and Bangladesh. In India, Ms. Anuradha Pareek, a grassroots DPO leader and member of local government from the state of Rajasthan was supported to attend the Asia Pacific Forum for Sustainable Development and contributed to the South Asia VNR group from the local level perspective. Ms. Pareek will now lead DPO consultations on the VNR process as a follow up and work with the longer-term localization of the SDGs with a focus on disability inclusion. In addition, Sightsavers India will contribute to the Wada Na Todo Abhiyan parallel report (national CSO platform on SDGs) and also produce a Disability Inclusion position paper based on a series of DPO consultations which will be shared with government, IDA and Together 2030.

Sightsavers Bangladesh is leading on the convening of the Disability Group within the Leave No One Behind Alliance. A series of DPO consultations will be held and the report shared with the LNOB group, SDG Coordinator from the PM Office along with a press conference to disseminate the results. They have completed one consultation with DPO members in Dhaka, planned to have two more consultations at the divisional level with district and local level DPO members. They will also contribute to the Citizen's platform for SDG. The platform is going to produce and share a report with the government named "Citizen's Report on the progress of SDG implementation".

Andrew reflected that the experiences shared show more organization in VNR countries and within CSOs, including on the setting up of national coalitions. Naiara remembered the coordinated work being promoted by CSOs in Kenya, Togo, Brazil and Sierra Leone, to name only a few.
